Course Title   **: Seminar**

Course Language   : Turkish

Course Objective   : The aim of this course is to determine a specific issue or problem in the field of Criminal Studies, to collect data related to the topic or problem, to analyze and discuss the data, and to present the results as a report in accordance with the recommended scientific writing rules. Through the studies conducted on research methods and procedures, it is aimed that the student who takes the course will have information about how to conduct research and prepare him/her for process of thesis writing.

Course Level   : Master Degree

Course Type / Contents   : Compulsory

Topics such as the presentation of subjects, developing the research question, displaying the literature review, determining the research method in the field of Criminal Studies are all covered in this context. In this framework, prominent topics in Criminal Studies are also discussed in the thematic speeches organized during the relevant course weeks.

Course Credits   **:** 3

Course Semester   : Spring

Course Lecturer   : **Asst.Prof. Gülçin ORHAN**

Course Lecturer Nu.   : +905058403781

Department Coordinator   : Asst.Prof. Gülçin ORHAN

Prerequisite   **:** Completing compulsory subject

Teaching Techniques   : Lecture notes

Reading List   : Creswell, J. W., & Creswell, J. D. (2021). Araştırma Tasarımı (Engin Karadağ, Çev. Ed.), Nobel Akademik Publishing, Ankara.

Course Title **: Artificial Intelligence Applications in Crime Investigations**

Course Language **:** Turkish

Course Objective **:**

 To ensure that students have knowledge about basic data types and the structures of databases according to data types, to contribute to their conscious, safe and effective use of data, and to increase their awareness.To ensure that students learn basic SQL commands to obtain data from databases and have knowledge about the use of data in databases. To ensure that students learn the basic knowledge levels of artificial intelligence and to ensure that they are informed about the historical development of artificial intelligence. To ensure that students learn the basic logic of feeding artificial intelligence with data and how to increase its success by training it with data structures. To ensure that students have knowledge about what criminal environments can be created with artificial intelligence applications with the help of technological infrastructures in the developing crime environment. To ensure that students learn how artificial intelligence technology can benefit in the fight against crime and criminals with artificial intelligence-supported prevention strategies in the criminal environment of the future.
